Professional Summary

Detail-oriented Computer Science graduate with postgraduate specialization in Big Data & Analytics and hands-on experience in data analysis, SQL, Excel, Python, KPI reporting, and operational analytics. Experienced in analyzing system data, identifying performance gaps, evaluating information quality, and translating analytical findings into actionable business insights. Skilled in SQL, Python, Excel, Tableau, Pandas, and reporting tools, with experience in query analysis, information-gap identification, and search-oriented data applications. Strong problem-solving and cross-functional collaboration skills with an interest in product analytics, search performance, user behavior, content optimization, and data-driven decision-making.

Education

Centre for Development of Advanced Computing (C-DAC)

2025

Post Graduate Diploma in Big Data & Analytics (PG-DBDA)

Hyderabad, India

Jawaharlal Institute of Technology

2024

Bachelor of Technology (B.Tech) in Computer Science & Engineering

CGPA: 7.47 / 10.0

Technical Skills & Competencies

Product & Data Analytics: Product Analytics, Data Analysis, KPI Analysis, User Behavior Analysis, Data Quality, Anomaly Identification, Performance Analysis, Business Reporting

Search & Information Analysis: Query Analysis, Information Gap Identification, Data Categorization, Retrieval Evaluation, Search-Oriented Analytics

Programming & Analytics: Python, Pandas, NumPy, Scikit-learn

SQL & Databases: SQL, PostgreSQL, MySQL, Hive, CTEs, Window Functions, Aggregations

Visualization & Reporting: MS Excel, Google Sheets, Pivot Tables, VLOOKUP, Tableau, Matplotlib

Data Engineering: Apache Spark, HDFS, Kafka, Data Pipelines, Structured Schema Design

Tools & AI: AI-powered Automation, RAG, Ollama, Docker, Git, GitHub, VS Code, Jupyter Notebook

Experience

Junior Software Developer

Jul 2026 – Present

Savoka System Pvt. Ltd.

Greater Noida, India

- Analyze business and technical requirements to support application development, feature improvements, integration, and testing.
- Investigate application issues and user-facing problems by analyzing workflows, technical information, and operational data.
- Collaborate with business and development teams to communicate findings and deliver solutions aligned with business requirements.
- Contribute to AI-powered SaaS products by evaluating workflows and integrating automation tools to improve business processes.

Trainee Software Engineer

Nov 2025 – May 2026

SpinSci Health-Tech

Hyderabad, India

- Analyzed system interaction data streams and operational logs to identify data anomalies, performance issues, and workflow bottlenecks.
- Monitored operational metrics and data quality indicators to identify performance gaps and support process improvements.
- Structured workflow rules and data normalization processes to improve information consistency and reliability.
- Supported recurring reporting by documenting analytical workflows, business rules, and operational findings.
- Collaborated with cross-functional teams to investigate issues and improve data accessibility and information reliability.

Python Intern
Pie Infotech Private Limited

Jul 2024 – Sep 2024
Lucknow, India

- Automated data preprocessing using Pandas and NumPy to clean raw datasets, handle missing values, and eliminate duplicate records.
- Performed exploratory data analysis (EDA) and developed visualizations using Matplotlib to identify statistical trends and data patterns.
- Analyzed datasets to identify quality issues and improve the accuracy and reliability of analytical outputs.
- Documented analytical workflows and collaborated with cross-functional team members to improve overall dataset accuracy.

Data & Analytics Projects

Telehealth Operational Analytics & Pipeline | *Python, PostgreSQL, SQL, Pandas*

- Engineered an automated pipeline to ingest, clean, and normalize multi-source healthcare log datasets, reducing data ingestion errors by 25%.
- Developed advanced SQL queries using CTEs, Window Functions, and Aggregations to extract operational KPIs including system performance, patient wait times, and call-routing efficiency.
- Analyzed operational metrics to identify performance patterns and translate complex transactional data into actionable business insights.
- Built summary reporting dashboards using Python visualization libraries to communicate KPI trends and support data-driven decision-making.

G-Scheme Bot: Intelligent Scheme Search & Analytics | *Python, RAG, Ollama*

- Developed a search-oriented web application using RAG pipelines to parse, index, categorize, and query structured datasets.
- Analyzed query-response patterns to identify information gaps and improve retrieval relevance for context-specific searches.
- Evaluated retrieval performance and refined search workflows, improving query accuracy by 30%.
- Structured and categorized information to improve findability and information accessibility.

E-Commerce Transaction & Revenue Anomaly Detector | *Python, Scikit-learn, Pandas*

- Performed exploratory analysis of sales and transaction datasets to identify seasonal purchasing trends, pricing patterns, and potential outliers.
- Applied statistical anomaly detection techniques to identify irregular transaction patterns for further investigation.
- Analyzed model outputs and refined anomaly detection logic, reducing false-positive reporting errors by 18%.

Core Competencies

Analytical Problem Solving Product & Search Analytics Data-Driven Decision Making

KPI & Performance Analysis Data Quality & Validation Quantitative Analysis

Data Storytelling & Reporting Cross-Functional Collaboration Process Improvement

Information Gap Analysis Query & Retrieval Analysis
